Supporting Seniors: Introducing our new dedicated program

Over the last 35-40 years, due to improved health care and general support, we have seen adult individuals diagnosed with “diverse-abilities” living longer lives than ever before.

As these individuals age, their care and support needs change and grow beyond the support capacity of our globally funded programs. For years, we have recognized the need for a dedicated seniors program and space – a comfortable, quiet environment in which our seniors can enjoy the activities they love at the pace they desire and with their friends.

Recently, we have been able to rearrange a couple of our global programs to provide the staffing necessary for a dedicated seniors program. Also, Clements Centre rearranged the location of our admin team to free up the space we needed.

We are thrilled finally to have such a space and program.

Believe us: the seniors are thrilled as well. They are all tremendously proud of their new space and are enjoying the greater support levels. They are busy and active when they want to be, whilst having a comfortable space to relax in when they feel like it.

Thank you to the  **PACIFIC BLUE CROSS** Health Foundation for financially supporting the renovation of our new seniors' program space.
